

ADVANCED TACTICAL PROVIDER

TEACHING HIGH THREAT
TACTICAL MEDICINE TO
MINIMIZE MORTALITY

Course Offering:

TACTICAL EMERGENCY CASUALTY CARE: (16 hours)

TECC is a set of best practice treatment guidelines for trauma care in the high-threat prehospital environment. These guidelines are built upon critical lessons learned by US and allied military forces over the past 17 years of conflict. They are appropriately modified to address the specific needs of civilian populations and civilian Responders. This includes pediatric, geriatric, and special needs patients as well as limitations of civilian EMS and the varied types of threats that all Responders face.

LOCATION:

- A-B Tech Woodfin Campus, 24 Canoe Lane, Woodfin

DATE: 10/19/18-10/20/18

TIME: 0800-1700
